

- SQG-type family S (no symmetry)
- ◇ Euler-type family, even N
- Euler-type family, odd N (C_2 -symmetric)
- × Euler-type, continued without C_2

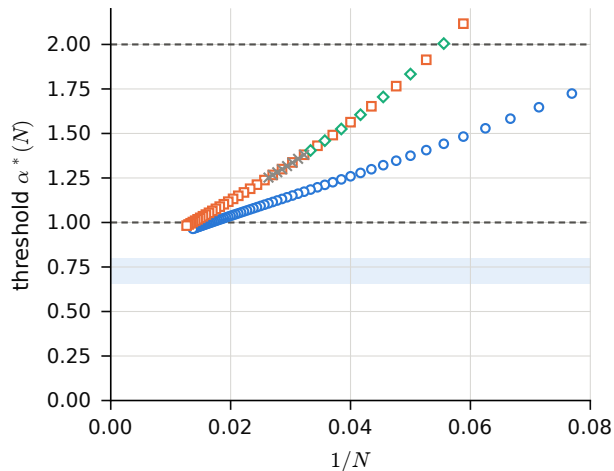

(a) Finite vortex counts

$\alpha = 2$: $N \geq 11$; SQG ($\alpha = 1$): $N \geq 60$

Dashed reference lines: $\alpha = 2$ and SQG ($\alpha = 1$)

(b) Reciprocal vortex count

fitted α_∞ : 0.66 to 0.80
